Citizen participation in any country- UK Diaspora

First of all citizen participation means “direct democracy” where people participate in decision making and gives full consideration to public input in decision making and also in active problem solving. Citizen participation can be demonstrated based on the concept of diaspora which is all the focus of the presentation that elaborate on the concept of brain drain to brain gain.Indian diaspora focussing on Northeast and Southern part of India, geographically speaking ,exodus of population of our Southern part of the country believes in diaspora which is the ultimate source of income for them. Believing is one and its manifestation is upon the policies of the Government of India,which is done through Ministry of External Affairs. Diaspora has its origin in the era of globalization when communication was playing an important part throughout the globe. Many scholars have objectified diaspora form the angles of socio-economic,political and cultural in order to stronger the ties with their origin countries in order to bring a life to the subjective concept of brain drain to brain gain to form a global village. Pravasi Bharatiya Divas is celebrated on the very core idea of it on 9th January which is so called based upon administration through democracy.

UK-Geographically speaking,The UK is an island nation in western Europe made up of Great Britain, part of Ireland and many smaller islands. The country UK focussed on its administration on economic growth,reforms on the planning system,infrastructure,energy,healthcare,education, childcare, and strengthening workers rights. So focussing on the subject matter view ,the key points must be raised such as-

a. The UK has a strong tradition of public service broadcasting, so the Indian administration can have a key look upon the concept of public service in its foreign draft policy in the chapter of diaspora.
b. The strength of economy affairs things like pay increases for workers and the amount of tax the government can raise to pay for services. Likewise, giving a look at the economy of UK , the social service is a key point from which a large amount of capital can be extracted. In the UK , the office of National Statistics publishes new GDP figures every month which comprises the amount calculated for Indian diaspora; GDP is the figure upon which spending more, extra jobs are created , more tax is paid and workers get better pay rises, so that the labour laws are also

focussing upon the statistical analysis of GDP based on which Indian Government calculates its capital which will be gained from businesses of diaspora in UK

c. Drawing on the social aspect:- Rising GDP could result from the richest getting richer, rather than everyone becoming better off and some people could be worse off. Focussing on the Indian values, gender equality is a key factor,based on which not only the gap but also the social ecosystem is based upon for example,in NCERT book it is noted. Gender is a social construct that impacts attitudes,roles, responsibilities and behaviour patterns of boys and girls , men and women in all societies. As Mahatma Gandhi says on gender,I am uncompromising in the matter of womens rights . In my opinion she should labour under no legal disability not suffered by men. I should treat the daughters and sons on a footing of perfect equality . So from this statement, that fact that can be analysed is that Indian mostly focus on its gender business so it is truly interested upon the UK's gender inequality to make it a equal one from its diaspora perspective.

d. The UK's planning system evolved significantly throughout history,with key milestones including the early introduction of "town planning" concepts through a ts like the Housing and town planning act 1909, where India can deliberately indulge into it by its historical significant evidence upon Indus vally civilisation planning of house basically upon the Harappa culture , the buildings were made by burnt bricks which has its present day relevance on the planning of urban civilisation that can make a focus upon the planning system of UK through its diaspora diplomacy, that is in local development framework which is a chapter on UK's legislation.

e. New Public Management which has been introduced in the Minnowbrook conference II of 1988 which comprises the scholars contributions like reinvesting government that is by David osborn, Ted gaebler, and the core factors like efficiency,economy, and effectiveness.
The concept of New Public Management in UK is increased focus on business like processes, change management and performance indicators in public services.

f. The UK's infrastructure history is marked by early industrialisation which led to significant development in transportation networks like canals and railways , primarily during the 19th century . The infrastructure development has its relevance in the development of the urban civilisation, where Indian government can step into as in potential investment in infrastructure maintenance, and expansion in order to build its capacity in infrastructure sector.

g. Energy- As the 20th century came across, coal and gas continued to supply most of the energy across the UK, where India can step into as an energy provider as it is now focussing on green energy resources from its natural resources, so that drawing upon its foreign draft policy. UK can be a striking country based on energy through diaspora of India.

Childcare
Energy

h. Healthcare- The UK’s healthcare system is primarily based upon the National Health Service established in 1948 where Indian government can indulge through in diaspora as providing telemedicine to the population and also affecting the healthcare factors of the country.

I. Education-The history of education in UK includes the establishment of universities, introduction of state funded schools and the expansion of higher education. In which Academic bank of credits which can make each individual's global credit on education on India’s based concept which can make each interpretation of educational talents or skills of individuals into credits which can be restored globally can be set as an example internationally which can be deliberately by Indian diaspora in UK which can give an additional impact upon the citizens of UK as education which changes the lifestyle of a citizen.

j. Childcare- The history of childcare in the UK includes the establishments of the preschools,the expansion of nursary schools and the introduction of policies to support childcare. The Indian government can focus on childcare basically through its concepts based on which Ministry of women and child development is formed. The deliberationof Bhagvad gota in schools as stated by Paul h appleby the concept also can improve the ethical standards of students from very early child development age.

k. Employment law- The UK government has led a mission on the principles of security, fairness, and opportunity for all which is also aligned with the policies philosophy of Indian government which can be propagated through its diaspora

Indian diaspora of UK play an important role inattracting FDI(Foreign Direct Investment) that is based on the concept of geo-economic constituency on the side concept of ease of doing business.
